

Retouching

With the advent of digital photography retouching is made easier and more available than ever before.

Most images need some amount of retouching. Retouching generally applies to faces.

Regular retouching is done to remove most large blemishes from a single person.

Heavy retouching is done to remove all blemishes from a single person. Heavy retouching is needed for removing patches of small blemishes and to restore skin to smooth condition. Add \$10.00 per pose.

Finishing Services

Natural Expressions offers full framing and finishing services. We have a large selection of traditional and contemporary frames to enhance your beautiful images.

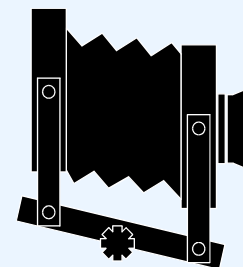

When framing a portrait that is 11x14 or larger, we recommend having your portrait mounted. Mounting refers to adhering the photograph to a foam-core board to keep the photograph flat to avoid rippling and denting.

Laminating is a clear protective covering that is added to the surface of your photograph. Having this covering will eliminate the need of putting a piece of glass over the photograph to protect it.. By eliminating the need for glass over your photograph your photograph will be lighter in weight, easier to care for and easier to see.
